About This Game

The Multidimensional Underwear Drawer is an **otome visual novel**, in which young Hana finds eternal love ... or death!

After a long time, **Hana** is single again. The breakup with her boyfriend **Jan** has hit her quite hard. While her best friend **Kerstin** and her childhood friend **Furio** try their best to free Hana from her depression, she focuses completely on her work and drowns herself in self-pity on the weekend.

But her gloomy mood summons two entities far worse: Two demons start inhabiting her apartment, in order to feed off her strained soul: **Tymoteusz** and **Einar** – One residing in her underwear drawer (which he also has happened to turn into a gate to hell itself), while the other possesses her teddy bear.

Adding to that chaos, her neighbor **Blanche** seems to have taken a rather special interest in Hana as well.

It's the dawn of a hard time for her: Two demons occupying her home, a lesbian besieging her and two friends constantly pampering her. On top of all that, her ex shows up to reconquer his lost love ...

Which way will be the right one for Hana? Which will lead to bliss? Which will lead to loneliness or even death? As Hana decides, so do you!

10/10 - by far the best Snowboard game ever. The BS 5s alone makes it money well spend.

. NovaLogic <3. Absolutely no effort went into making this joke of a game. Starting with the logo of the clowns who made this weak attempt of a game. Static Backgrounds, poor crappy scrolling, mind-bendingly stupid designed enemys.. dont play if you dont want to spend the rest of your life on it. Not what I expected at all. Too boring for me, and too short.. Get's boring after a couple of hours. Nothing to do.. i was told to change all negative into positive reviews. Rowan and Orlando The Peanut Merchant.. Lame. You play as a sticky ball that rolls along the edge of things and tries to beat other sticky balls to the objectives. It sounds lame because it is. It has local co-op, which I didn't try, but I'm sure that would still be lame. But do check out the video for this game in its Community Hub, which is hilarious.. Full Disclosure: I was given a copy for review on YouTube by the publisher.

Probably one of the weirdest experiences I have ever had. I can see why you would classify it as horror, but the game isn't really scary. Euclidean is simply falling, watching the world move around you while trying to avoid deadly creature by phasing through them. A very creative game and definitely worth trying out if you love atmospheric horror.

Got it for the 2EPB, but it was definitely worth the purchase. At only 12 USD, this is a bang for your buck. My only complaint is the 4CIG which is a complete mess. The guard buzzer is the High horn... anyways, this pack gets a...

7V10. For an EA the gameplay is fun and it looks promising if the ideas that the group have come through. The graphics are somewhat basic but it again it is an EA so I am fine with that.. It's pretty dang fun. Not easy either. Getting the hang of it takes a few minutes and usually dying a time or two. It's got a lot of potential, and it's improving. I look forward to seeing where this goes. Throwing grenades, and using some of the automatic weapons rock. Loot and mow down hoards of creatures, fly around a find things to loot and fight? I'll have more please.

It has it's bugs that need fixing. Some minor improvements as well, but over all it's fun. I'm looking forward to some updates.. Do not buy. Developer inactive. Broken Game.. Got this game from a bundle so it works out i paid roughly £1 for this game, still not worth it. Games dead, no updates in months if not a year and the most people i've seen "online" is 6. I quote "online" because it's nearly impossible to actually get into a match with anyone else unless you arrange to play with friends.. this game is so much fun! If you enjoy heroscape it is a must have.. It's another Unity Game yaaaaaaay.

Except this takes the Cheap Unity Game Genre (Yes I am claiming it exists now) And actually gives you something that works. It's a decent puzzle game with much room for inventive scenarios. A level editor would have been nice. But once again "Cheap Unity Game."

It's playable, its cheap, its fun at times, and it works. And as most Cheap Unity Games have it has Trading cards. Overall it seems like a game that would be in a Math Game site under the "Physics Games" disguise so they can have real games there also.

It should bring you an unspecified amount of time of enjoyment. Depending on where you stand in the I like "Puzzle Games scale." I'd recommend if it goes cheap to grab it though. It's worth the money with 60 levels.
